Project

1. Name : Design and development of an embedded system to detect military Fratricide crisis.

Description :

Friendly fire is the situation where military forces attacks on friendly forces while attempting to attack the enemy. Causative reasons may be either misidentifying the target as hostile. In this proposed work one such attempt is made to develop an embedded device to identify friendly forces. Implementation method gives special consideration to efficient encryption and decryption methodologies and theft security for the module.

Interpersonal skills

- Good Learning ability.
- Can work in team as well as individual.
- Flexibility and Adaptability to work in any environment.
- Honest and Hard Working.
- Good communication skill.

Extra-Curricular

- Part of “LEAD” team by doing small social service programs.
